THE NEUROLAT ADVANTAGE

The Building Blocks of Intelligence

The NeuroLAT learning abilities program is built on the groundbreaking research of Karl Witte. Karl Witte was a German Philosopher and Paster who pioneered the understanding that the child's learning environment and method of learning are vital to great success.

Even those born with lower IQ can be trained to much higher IQ with the right pedagogies and methodologies.

Empowering Children

NeuroLAT empowers children by giving them the essential tools necessary to acquire more than 30 learning abilities required to achieve higher academic performance.

With much sharper, confident and brighter minds, children can have a happier time overcoming academic challenges to achieve a more fulfilling childhood.

What does NeuroLAT Train?

The NeuroLAT program trains more than 30 different learning abilities in your child.

These learning abilities can be classified into the following categories:

COGNITION: The ability to understand information received through any or all of his/her senses.

MEMORY: The ability of the mind to store and remember information both visually and through auditory senses.

CONVERGENT PRODUCTION
Convergent Production is the ability to produce logical answers to a problem.

EVALUATION
The process of using all the information provided to make judgement and decisions.

DIVERGENT PRODUCTION
Divergent thinking is the ability to process and generate creative ideas by exploring many possible solutions.

How The NeuroLAT A.I. Program Works

> **A WINNING FORMULA FOR ACADEMIC SUCCESS**

1. CONSISTENT EXPERT TRAINING
The NeuroLAT training program works by accelerating the learning abilities crucial for your child's school grades so that you can see better and faster results. Imagine an expert educational psychologist training your child with the aid of a fun and proven artificial intelligence. The NeuroLAT program trains your child over unlimited and exciting IQ questions daily anytime anywhere, with WIFI access.

2. OPTIMIZED LEARNING
Your child will be diagnosed to gauge where his/her abilities is at and the A.I. system will prepare a customized training to skillfully enhance his pace of learning. This will allow your child to reach his optimal pace and cognitive capabilities, while improving from his weak points and excelling at his strong points.

3. PREPARING FOR ACADEMIC SUCCESS
Your child will find it easier to memorize, understand and regurgitate every subject he/she learns! Watch your child gain confidence and be empowered to tackle any academic subject much more effortlessly!

4. CONSISTENT COMPREHENSIVE REPORTS
The A.I. system generates 3 comprehensive diagnostic reports for you and your child after every 90 lessons (3 months or less).
• Learning Needs Diagnosis Report
• Preferred Learning Styles Report
• Suitable Vocational Analysis Report
